Scholarships To El Camino Offered by Elks

Local high school and junior college students who are in the upper five per cent of their class may now apply for scholarships through Redondo Beach Lodge No. 1378 of the Elks, W. Holmes Smith, assistant director of student personnel at El Camino College, and A. T. Larson, chairman of the scholarship committee of the Elks lodge, announced this week.

The national awards range from \$900 to \$400 each. Two \$300 scholarships also will be awarded by the Redondo Beach lodge to two students of schools within its jurisdiction.

Further information may be obtained from the office of student personnel at the college.

Competition For Awards In Art Told

Competition for art scholarships, open to El Camino College students, was announced this week by W. Holmes Smith, assistant director of student personnel.

Three awards to artists in the field of water color and painting will be made in the James D. Phalen Awards competition, Smith said.

Applicants, both men and women, must be native born citizens of California between the ages of 20 and 40. Applications must be made on forms supplied by the office of the James D. Phalen Award in Literature and Art, 820 Phalen Building, San Francisco.

Each applicant will submit two paintings, Smith said, both of which may be accepted for exhibition. The competition closes March 14.

Tax Refund Due Torrance For Airport

State Controller Robert C. Kirkwood yesterday announced the allocation of \$287.48 to Torrance for capital outlay on the Torrance Municipal Airport.

Part of the \$395,473.09 allocated to cities and counties, the funds were included in a total allocation of \$42,598.24 to Los Angeles County.

The county received half, or \$21,149.12, and the balance was apportioned to the Los Angeles International Airport, Long Beach, Santa Monica, Torrance, and Hawthorne.

These funds, according to Kirkwood, are derived from motor vehicle fuel taxes paid on aviation gasoline during 1951-52.

New Harbor Well Will Not Give West Basin Data

A new well being drilled in the harbor area will be only 100 feet deep and thus will not provide the hoped-for data on water quality in the deeper Silverado zone, members of the West Basin Assn. were told this week.

The well will produce filtered sea water to be used in repressuring the oil-producing zones in the harbor area, where subsidence is occurring.

Pending West Basin litigation will be discussed at a 2 p.m. Feb. 11 meeting in Los Angeles by the committee of attorneys and engineers representing both parties in the suit.

The State Water Resources Board will meet in Los Angeles Feb. 13 and 14 and will visit the West Basin salt water barrier test site in Manhattan Beach.

Next session of the board of directors, West Basin Water Association, will be held Thursday evening, Feb. 26, at the Palos Verdes Country Club.
